

## ShowerChannel

### Pirtek Stadium, Parramatta, NSW

Parramatta Stadium, currently known as Pirtek Stadium, is located 23km west of Sydney's CBD. It is home to a number of professional sporting teams based in Western Sydney, including the NRL's Parramatta Eels and the A-League's Western Sydney Wanderers. The recent refurbishment to the stadium increased the seating capacity to 24,000, made improvements to the player facilities and the administrative offices.

### Project Design Brief

In the shower facilities, designers wanted to incorporate a modern look with large contemporary tiles installed on simple one way falls to facilitate safe and efficient drainage.

### ACO's Solution

- QuARTz by ACO ShowerChannel with Linéaire grates (Custom manufactured)

### Benefits

- ACO custom manufactured the channel to the exact required length, to suit the specific shower dimension
- ACO advised designers on the amount of outlets that would be required along the shower channel to capture the maximum amount of water from all the shower heads operating at the same time
- The Linéaire grate has slip resistance Classification B to AS 4586 and complies with the required safety standards for communal wet areas
